FounderGate Evidence Pack — Design Partner Edition

Run ID: `sc-15f0cfc5` · **Repository:** pypa/sampleproject · **Exact commit:** `621e4974ca25ce531773def586ba3ed8e736b3fc`

archive SHA-256	`fd8597e4d351a9fd42007f48339dc93ee6469d8555fd0ff24906c69905357c01`
snapshot SHA-256	`649ecb02d79d5cee55c86549b6dff26fb341c4a4de6d3c92d959c42714b6e7de`

Claims

compileability: OBSERVED · build: NOT_PROVEN · tests: NOT_PROVEN · security: NOT_PROVEN · production_readiness: NOT_PROVEN · network_isolation: OBSERVED (default-deny; example.com denied) · docker_socket: OBSERVED (absent) · host_mounts: OBSERVED (none; only provider execd-staging volume) · port_binding: OBSERVED (loopback-only) · in_sandbox_manifest_match: PROVEN · teardown: PROVEN (session gone) · snapshot_deletion: PROVEN (removed under observable state) · vm_destruction: PROVEN (instance removed) · general_public_execution: HELD · private_repositories: REFUSED

Limitations

- compileability observed only — build/tests/security/production NOT proven
- runc standard container (not microVM)
- OpenSandbox tested, not adopted
- deletion is observable-state, not forensic erasure
- fixed public evaluation fixture only

Environment

disposable Ubuntu 24.04 ARM64 (Lima/VZ) on Apple M4 Pro; patched opensandbox-server 0.2.1 (loopback)

This is an evidence packet, not a certification.

FounderGate Evidence Pack — evidence of the named checks on the exact recorded version; not a security, compliance, production-readiness, or bug-free certification.
